

We can Cater for most people's needs or demands from their vehicles whether it be performance, economy, speed limits. Tuning is not all about more speed, reducing your zero to sixty times, it is also about more driveability, making your vehicle as smooth and torquey as possible. Economy, getting the most from your fuel i.e. travelling as far as you can on your fuel especially with the cost of fuel where it is, without the compromise of performance or serious power loss. Oscarli has the ability through modern technology to re-tune your vehicle to return between five to fifteen percent more economy with like for like performance. We tune all types of vehicles from passenger cars, sports cars, and commercial vehicles such as small vans, seven and a half ton trucks, and large commercials. We have tuned emergency vehicles delivery vans and racing vehicles .We have the ability to limit the top speed of delivery vans and cars so as to gain economy, and reduce the risk of speeding fines. We have also had good result tuning large motor homes which start out life as a van chassis cab, and then when the large body is fitted they struggle to pull top gear at the legal limit especially in strong wind conditions. Oscarli can also save you money on vehicles allowing you to buy a cheaper low horse power car reducing your tax burden and tuning the vehicle to give the same level of performance as a higher cubic capacity car for a fraction of the cost, e.g. Passat 1.9tdi 105ps tune to145ps, instead of buying a Passat 2.0 tdi 140ps, a saving on purchase price £2000.00 at least. We can also vary the performance packages from mild tuning to wild tuning, technology and vast experience has made Oscarli a versatile and flexible package to suit your every need.
